What it does

Antivirus and Antispyware	Scans all inbound and outbound POP3, SMTP and IMAP traffic
	Filters email-borne threats, including spyware at the gateway level
	Provides all tools for full-fledged server protection, including the resident shield and on-demand scanner
	Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact
Antispam	Stops spam and phishing messages with high interception rates
	Improved antispam engine allows to define antispam threshold scores with greater precision
	All antispam settings are fully integrated in the product's GUI
	Real file type detection - lets admin apply policies for specific type of content in e-mail attachments
Remote Administration	ESET Mail Security for MS Exchange is compatible with ESET Remote Administrator
	Offers a set of pre-defined actions in response to scanning results
	Allows you to remotely deploy, manage, update and report on all instances of ESET security software in the company network
Logs & Statistics	Lets you keep abreast of security status with detailed and comprehensive logs and statistics
	Spam logs - Displays sender, recipient, spam score, classification reason and action taken
	Greylisting log - Displays greylisted sender, recipient, action taken and status
	Allows to monitor server performance in real time
Smooth Operation	Automatically excludes critical server files from scanning (including Microsoft Exchange folders)
	The built-in license manager automatically merges two or more licenses with the same customer name
	Improved installer supports migration of all previous version settings (v4.2 or v4.3)
	eShell command line control lets the admin run scripts to perform actions or create/modify configurations
Enhanced Quarantine	Allows to create separate quarantine configurations for individual mailboxes
