ABOUT THE CUSTOMER

The University of Vigo, Spain has facilities for studying and leisure located in its Vigo, Ourense and Pontevedra campuses. It runs student mobility programs with part of the training taking place abroad and offers internships in companies and institutions to complete the academic training. Considered the most technical of the universities of Galicia in Spain, it offers engineering degrees in Mining, Telecommunications, Computer Science and Industrial Engineering.

WHY ESET?

Mainly, the challenge was detection capabilities. In the past, the University of Vigo had used two different antivirus solutions. But only after ESET was installed and tried, the infection rate decreased rapidly and the whole institution decided to switch to ESET.

ABOUT ESET ENDPOINT ANTIVIRUS

ESET Endpoint Antivirus protects computer users from all types of malware, including viruses, spyware, rootkits and phishing. Built for speed and low system demands, the solution is based on our record-holding scanning engine, the winner of the most Virus Bulletin "VB100" awards of all antivirus makers.

In the SMB and corporate environment, the solution can be easily managed by ESET Remote Administration that gives network administrators strong tools designed to provide real-time oversight of network security.

BENEFITS OF ESET PROTECTION IN UNIVERSITY ENVIRONMENT

- Improved workstation security
- Less hours devoted to maintenance and resolving of issues
- Increased stability and performance
- Unified remote management of all clients
