MOBILE SECURITY

ESET Mobile Security provides superior security for your Android smartphone or tablet. Enjoy premier protection against viruses, trojans, ransomware and other malware which can expose your sensitive information or encrypt your data. The Payment Protection feature also provides extra security to your online shopping and banking.

Keeping you safely connected with Antivirus & Payment Protection

Enjoy your time online wherever you connect, knowing you are protected. Steer clear of potentially unsecured payments and foreign interference. Rely on proven NOD32 technology to make sure all apps you download and websites you visit are safe. With Payment Protection, you can enjoy online purchases and other sensitive transactions more safely.

Real-time Scanning	Ensures that all installation files and installed apps are automatically screened for malware. You stay well-protected against online and offline threats including viruses, trojans and ransomware.
On-demand Scanning	Whenever you suspect foul play, run a scan on your phone. It takes place silently in the background, without interrupting your ongoing activities. Access logs and detailed scan results to check for detected threats.
ESET Live Grid	Ensures real-time protection against emerging threats by using in-the-cloud technology collecting malware samples from ESET product users from all over the world.
USB On-The-Go Scanner	Every connected USB device will be checked first to prevent malware accessing your smart phone.
Adware Detector	Helps you identify applications that might overlay your screen with unwanted ads.

Premium Features

Anti-Phishing	Protects against malicious websites attempting to acquire your sensitive information – usernames, passwords, banking information or credit card details on most used browsers for Android.
Application audit	See which of your apps has access to what information on your smartphone or tablet. Also monitors sensitive device settings that can lower security such as Debugging Mode that can allow a connection to the system via USB.
Scheduled Scan	Schedule a regular scan for malware at a convenient time – overnight or while the phone is charging if desired.
App Lock	Keeps your applications safe against unauthorized access. Additional authentification is required when accessing sensitive apps so content can be hidden when lending the device to someone.
Automatic updates	Constant updates of your virus signature database.
Network Inspector	Monitor your home network easily and with confidence. All devices connected to your home network are identified and automatically checked for vulnerabilities. Your router is also monitored to identify vulnerabilities and increase your level of protection when connected to a new network. Password strength is also checked and open ports are analyzed.
Call Filter	Block calls from specified numbers, contacts and unknown numbers.
Payment Protection	A new security layer that increases your security when you use sensitive apps to access your money or perform sensitive transactions. This feature automatically recommends protection of apps included in the Finance category (installed from the Google Play Store).

Proactive Anti-Theft:
Control your missing phone via ESET HOME

Rely on nifty features that help you protect and find your phone in case it goes missing.

Premium Features

Proactive Anti-Theft	It acts when it detects suspicious behavior. If incorrect Screen lock (PIN, pattern, password) or unauthorized SIM is inserted, device gets locked and snapshots from phone cameras are automatically sent to ESET HOME. The information includes the phone's location, current IP address, inserted SIM details and other data. The user can mark the device as missing at home.eset.com and start Location tracking or send Custom on-screen Message or even Wipe the device contents.
Custom On-screen Message	Send a custom message to the missing device to contact the finder. The message will appear on screen even when the device is locked.
Location Tracking	When the device is marked as missing, the location is regularly sent to ESET HOME and displayed on the map, helping you track its position in time. If the device's location changes, its location is sent to ESET HOME for up-to-date tracking.
Camera Snapshots	Snapshots are automatically and regularly sent from the phone's front and back camera to ESET HOME if the device is marked as missing. This helps to identify its location or its finder.
Low Battery Alert	When the device is low on battery, its current position and camera snapshots are automatically sent to ESET HOME before it shuts off.
SIM Guard	Lets you stay in control of your phone if it goes missing. Your phone will be locked when unauthorized SIM card will be inserted.
Anti-Theft Optimization	Automatic notification when settings are limiting Anti-Theft's functionality (GPS turned off for example).

Security Overview

Check your device's security status – quickly and easily

Security Report	Gives you a monthly insight into how ESET protects your device. The report gives you information about the number of scanned files, blocked web pages and much more.

Premium Features

Security Audit	See which of your apps has access to what information on your smartphone or tablet. Also monitors sensitive device settings that can lower security such as Debugging Mode that can allow a connection to the system via USB.

Manage and maximize your security with ESET HOME

ESET HOME is a web portal and mobile app for Android and iOS that provides comprehensive oversight of ESET products, licenses and services on your devices. It's designed to be accessible whenever you need it, wherever you go. Get important security and license notifications, and check the security status of protected devices at any time. Install protection for new devices without typing your license key or login. Upgrade and renew your licenses. Add, manage and share licenses with family and friends. Manage Anti-Theft, Parental Control and Password Manager via the ESET HOME portal. All this and more is now available to you in one place, at any time.

Devices	Connect Windows and Android devices to your account via QR code, including Windows devices remotely, and check their security status at all times. Download and install protection for new devices and instantly secure them against threats.
Licenses	Add, manage and share licenses with family and friends. Upgrade and renew when necessary, and control at all times who else can use your license.
Notifications	Device, license and account notifications are part of both portal and mobile app. In addition to security and license information, available actions are detailed.
